STRENGTHENING ARTS EDUCATION IN NO CHILD LEFT BEHIND
HELPING CHILDREN ACHIEVE IN SCHOOL, WORK, AND LIFE

America’s orchestras are committed to advocating for better music education in our nation’s schools. The U.S. Department of Education is charged with promoting educational excellence throughout the nation, and federal law recognizes the arts as a core subject of learning. However, in implementing NCLB, school systems are diminishing access to arts education. All students should be able to reap the benefits of a full, comprehensive education in all core subjects, including the arts.

ACTION NEEDED
We urge Congress to:
• Ensure that all American students reap the benefits of a full, comprehensive education in the arts. As Congress begins reauthorizing the No Child Left Behind Act (NCLB), it must provide support for state and local education agencies to ensure that arts education is fully implemented as a core academic subject.
• Implement the attached recommendations related to reauthorization of NCLB.

BACKGROUND
The No Child Left Behind Act, the 2001 update of the 1965 Elementary & Secondary Education Act (ESEA), will expire in September 2007. Congress is beginning the process of reauthorizing this law.

Attached to this issue brief are specific legislative recommendations and a paper titled Arts Education: Creating Student Success in School, Work, and Life which is a statement supported by more than 60 national arts education and education organizations. This unified statement serves as a tool for communicating the benefits of arts education to policymakers at all levels as federal lawmakers begin the process of reauthorizing the No Child Left Behind Act.

TALKING POINTS
• The arts are designated as a "core academic subject," but, implementation of NCLB has led to the erosion of arts education in the schools. A report from the Center for Education Policy concludes that, since the enactment of NCLB, 22% of school districts surveyed have reduced instructional time for art and music. As Congress begins discussions on reauthorization of NCLB, it must address the law’s unintended consequences, which have diminished the presence of arts education in our schools.

• The arts are proven to help close the achievement gap. A 2006 study by the Arts Education Partnership, Third Space: When Learning Matters, finds that schools with large populations of students in economic poverty—often places of frustration and failure for students and teachers alike—can be transformed into vibrant and successful centers of learning and community life when the arts are infused into their culture and curriculum.

• The arts prepare students for success in school, work, and life. The 2006 report from the New Commission on the Skills of the American Workforce, a bipartisan assembly of Education Secretaries, state officials, and business leaders, said in its executive summary, “The best employers the world over will be looking for the most competent, most creative, and most innovative people on the face of the earth and will be willing to pay them top dollar for their services.” The report includes the arts as an essential skill for the future workforce.

The American Symphony Orchestra League is a member of the Legislative Planning Committee for Arts Advocacy Day 2007. Positions in this brief were developed in partnership with the Committee.
Strengthen Arts Education in the Elementary and Secondary Education Act

Legislative Recommendations

Retain the Arts in the Definition of Core Academic Subjects of Learning

The federal government requires that a complete education for every child include rigorous instruction in all "core academic subjects"- a designation given to the arts in the No Child Left Behind Act.

Retain the arts in the definition of core academic subjects.
No Child Left Behind Act of 2002, Title IX General Provisions, Part A Definitions, Sec. 9101 Definitions (11)
CORE ACADEMIC SUBJECTS – The term ‘core academic subjects’ means English, reading or language arts, mathematics, science, foreign languages, civic and government, economics, arts, history, and geography.

Require Annual State Reports on Student Access to Core Academic Subjects

Collecting and reporting the status and condition of arts education and other core academic subjects at the state level is critical to ensuring equitable access to a comprehensive education for all students.

Amend Title I., Part A, Subpart 1 Basic Program Requirements, Sec. 1111(h) State Plans to require states to collect and report annually comprehensive information about the status and condition of all core academic subjects for which challenging academic standards apply. Such information should include student enrollment, pupil/teacher ratios, amount of instructional time, budget allocation, teacher subject certification, full time equivalent teacher load, or other such measures chosen by the state to be significant in the subject area.

Improve National Data Collection and Research in Arts Education

The U.S. Department of Education’s research efforts must be strengthened by systematically including the arts in studies conducted on the condition of education, practices that improve academic achievement, and the effectiveness of Federal and other education programs.

Amend the Education Sciences Reform Act of 2002, Public Law 107-279, Title III, Section 303 to require a National Assessment of Educational Progress in the Arts once every five years, in grades 4, 8, and 12.

Amend the Education Sciences Reform Act of 2002, to require the National Center for Education Statistics to collect and disseminate full and complete statistics on the condition and progress of education at the preschool, elementary, secondary, postsecondary, and adult levels in the United States in all core academic subject areas.

Reauthorize the Arts in Education Programs of the U.S. Department of Education

The Arts in Education programs of the U.S. Department of Education identify and support successful models of arts instruction, integration, and professional development, and support the leadership initiatives of VSAarts and the John F. Kennedy Center for the Performing Arts.

Reauthorize Title V, Part D, Subpart 15 Arts in Education, Sec. 551 Assistance for Arts Education, including findings recognizing the benefits of arts education and improving the dissemination of timely information about the impact and best practices resulting from projects funded through the Arts in Education programs.

September 12, 2007
A child's education is not complete unless it includes the arts. In fact, the No Child Left Behind Act (NCLB) lists the arts among the core academic subjects, requiring schools to enable all students to achieve in the arts and to reap the full benefits of a comprehensive arts education.

In spite of this federal direction, access to arts education in our schools is eroding. A report from the Center for Education Policy concludes that, since the enactment of NCLB, 22% of school districts surveyed have reduced instructional time for art and music. This is happening at a time when parents, employers, and civic leaders are demanding improvements to the learning environment that will make our schools places where all learners will access a complete education and opportunities to succeed. These demands cannot be met without comprehensive arts education in our nation's schools.

**The Arts Prepare Students for School, Work, and Life**

As this country works to strengthen our foothold in the global economy, the arts equip students with a creative, competitive edge. To succeed in today’s economy of ideas, students must masterfully use words, images, sounds, and motion to communicate. The arts provide the skills and knowledge students need to develop the creativity and determination necessary for success in today's global information age.

**The Arts Strengthen the Learning Environment**

Where schools and communities are delivering high-quality learning opportunities in, through, and about the arts for children, extraordinary results occur. A recent study by the Arts Education Partnership, *Third Space: When Learning Matters*, finds that schools with large populations of students in economic poverty - too often places of frustration and failure for both students and teachers - can be transformed into vibrant hubs of learning when the arts are infused into their culture and curriculum.

**The Arts Can Retain Teachers Who Love to Teach**

The retention of our best teachers is a daunting challenge. It can be met, however, by ensuring schools embrace the arts. Schools, especially those struggling, can retain their best teachers by becoming havens for creativity and innovation; places where students want to learn and teachers want to teach. As we aim to improve the teaching environment, the arts can help us retain our best future and current educators in our nation's schools.

A comprehensive strategy for a complete education includes rigorous, sequential arts instruction in the classroom, as well as participation and learning in available community-based arts programs. Public schools have the responsibility for providing a complete education for all children, meeting the commitment put forth in NCLB. The federal commitment to arts education must be strengthened so that the arts are implemented as a part of the core curriculum of our nation's schools and are an integral part of every child's development.
Achievement in and through the Arts

**Position:** The Arts Help Close the Achievement Gap.

**Argument:** The arts make a tremendous impact on the developmental growth of every child, leveling the "learning field" across socio-economic boundaries. The arts reach students not otherwise engaged, uniquely bridging the broad spectrum of learning styles. Low achieving students often become high achievers in arts learning settings. Their success in the arts classroom often transfers to achievement in other subject areas. Students who participate in the arts outperform those who do not on virtually every measure. Researchers found that sustained learning in music and theater correlate to greater success in math and reading, with students from lower socio-economic backgrounds reaping the greatest benefits.¹ It is now accepted that the arts are uniquely able to boost learning and achievement for young children, students with disabilities, students from economically disadvantaged circumstances, and students needing remedial instruction.²

Students in high-poverty schools benefit dramatically from arts education. The arts teach children the skills necessary to succeed in life, including learning to solve problems and make decisions; learning to think creatively; building self-esteem and self-discipline; articulating a vision; developing the ability to imagine what might be; and accepting responsibility to complete tasks from start to finish.

**Ask:** Academic achievement for disadvantaged students should be strengthened by integrating successful arts education models into the schools. Urge high-poverty schools to use federal funds to ensure that a comprehensive arts education is available for all students and to integrate the arts into school curriculum to improve student achievement. Provide support for local, state, and national partnerships that promote standards and strategies in support of arts education.

Educational Equity in and through the Arts

**Position:** The Arts Are a Core Academic Subject and Must Reach All Children.

**Argument:** The federal government requires that a complete education for every child must include rigorous instruction in all "core academic subjects" - a designation given to the arts in the No Child Left Behind Act (NCLB). Unfortunately, national studies have shown that the implementation of NCLB has led to the erosion of art education in the schools, with 22% of surveyed school districts reporting a decrease in instructional time for art and music.¹ U.S. Secretary of Education Margaret Spellings has said, “Many educators across the country have shown that a focus in NCLB on reading and math is not mutually exclusive of the arts and music. In fact, we all know that a well-rounded curriculum that includes the arts and music contributes to higher academic achievement.” A comprehensive arts education – fully integrated as a core subject of learning – fosters the creativity and innovation needed for a more competitive workforce.

Department of Education Arts in Education (AIE) programs identify and disseminate successful models of arts instruction, integration, and professional development, and support the leadership initiatives of VSAarts and the John F. Kennedy Center for the Performing Arts. In addition, in-school and after-school learning partnerships with arts organizations which, when teamed with rigorous instruction in the arts during the school day, provide students with opportunities to achieve arts literacy. These programs decrease the frequency of delinquent behavior and school truancy, and improve overall academic performance, communication skills, and the ability to complete work on tasks from start to finish.

**Ask:** Congress must address the unintended consequences of NCLB that have diminished the presence of arts education in our schools; as one of NCLB’s core academic subjects, preserve and strengthen the arts and improve the implementation of the arts as a core academic subject at the state and local levels. Congress should also continue and strengthen support for programs and partnerships that maximize the capacity of the arts to reach all students, including the Department’s AIE program, the primary Federal initiative for developing national models in arts education and professional development.

Teachers and the Arts

**Position:** The Retention of Arts Teachers Is Crucial to Creating Powerful Learning Communities and Maximizing Student Achievement.

**Argument:** One-third of new teachers leave the profession within three years; half within five years. Most affected are urban, rural, and minority communities with large populations of students in economic poverty. But schools have the ability to retain their best teachers by transforming schools - especially those drowning in frustration and failure for students and teachers alike - with the infusion of the arts into their curriculum. When schools embrace the arts, they can become vibrant and successful centers of learning and community life - places where students want to learn and teachers want to teach. For schools to develop this sense of community and collaboration through the arts, arts instruction for every child must be delivered by teachers with specific and expert arts and education knowledge. To do otherwise dilutes both the benefits in student achievement and opportunities for schools to retain their best teachers.

**Ask:** To provide students with a complete education, the arts must be both comprehensively learned and rigorously taught as a core academic subject. In addition to providing students with essential skills to succeed in school, work, and life, rigorous arts education offers a methodology for learning that generates creative teaching solutions from which all teachers can benefit. Student learning will benefit by ensuring arts education specialists are the providers of rigorous arts instruction, continuing support for professional development of new and experienced teachers, and increasing federal support for the transformation of struggling schools into successful learning communities through the arts.

---

**Improve National Measurements of the Arts**

**Position:** The U.S. Department of Education Must Include the Arts in All Research and Data Collection Regarding the "Core Academic Subjects."

**Argument:** NCLB and current U.S. Department of Education policy make it clear that decisions regarding education should be made on the basis of research. Furthermore, as this nation crafts major policies regarding the future of public education, it is imperative that sound research is available on the status of learning and teaching in our schools. The U.S. Department of Education is the only entity in a position to collect essential national demographic information and to guide policy research of this kind. In the past, influential data-gathering has taken place in a manner that excludes the collection of information on the arts. For example, the Department’s January 1999 study on "Teacher Quality" specifically excluded arts teachers from the study sample. Meaningful research is needed to determine the status of dance, music, theater, and visual arts education. Since the arts are designated as a core academic subject, they should be included in all research and data collection efforts by the U.S. Department of Education.

For example, the Fast Response Survey System (FRSS) report, *Arts in Education in Public Elementary and Secondary Schools*, is the only Department of Education-produced research report on the status of how arts education is delivered in America’s public schools. The last FRSS report on arts education featured data collected in the 1999-2000 school year. An updated report with the next round of data collection is long overdue. The National Assessment of Educational Progress in the Arts (NAEP) - the national arts "report card" - provides critical information about the arts skills and knowledge of our nation’s students. The next NAEP is scheduled to be administered in 2008, and must stay on track. The FRSS and NAEP are essential to studying and improving access to the arts as a core academic subject.

**Ask:** The U.S. Department of Education’s research efforts must be strengthened by systematically including the arts in studies conducted on the condition of education, practices that improve academic achievement, and the effectiveness of Federal and other education programs.
